Nicoleta Caluian

Web Developer

I'm a highly motivated person, who is looking to continue in a career as a web developer. I'm seeking a suitable position within this field with an ambitious company. Right now I would like to work for a company that has a challenging and innovative environment where I can bring fresh ideas whilst at the same time continuing to improve my skill set further.

- Participating in daily meetings

SKILLS

HTML, CSS, JavaScript, Typescript

ReactJS, NodeJS, ExpressJS

ReduxJs, Redux Thunk

React Router

GitHub, Material UI

COMSOL, MATLAB

CATIA V5, Inventor, SolidEdge, Ansys

PERSONAL PROJECTS

Burger Builder (05/2023 - 06/2023)
- I developed a burger builder app with ReactJS where users can build their desired burgers and by the options register or login they can order them and also see all previous orders they made.
- I used: stateless and stateful React components, Redux library to easily manage the app states, React Router to handle routing in my SPA, Firebase Realtime Database to store initial ingredients and orders, Firebase Authentication for storing users and Firebase Hosting service for deploying and hosting.
- I used the best and in trend coding practices for users to visualize their burger in real time, and see the price update dynamically.
